

The region's number one electrical engineering contractor

Project: Commercial electrical installation – new build industrial & office units

Client: Commercial developer

Description: Electrical 1st & 2nd fix to workshop and office areas

ParCar undertook all elements of electrical installation for the industrial/commercial units on a new business park. All small power, lighting, containment, emergency and security systems were installed by Parcar. We also provided all exterior lighting and door entry systems.

The work was completed and the units handed-over on time and within budget.
