

The region's number one electrical engineering contractor

Project: Generator decommissioning and subsequent refurbishment

Client: Undisclosed

Description: Comprehensive refurbishment & minor modification of generator

ParCar undertook the decommissioning and subsequent refurbishment of this generator having recently installed its replacement on a UK defence establishment. The unit underwent extensive testing and refurbishment as well as minor electrical modification before being shipped by Parcar to an EU based customer.

Parcar arranged all aspects of shipping, mechanical work, interior and exterior refurbishment and restoration, and testing
